ILHÊME MALIKI

TELECOMMUNICATIONS & NETWORK ENGINEER

Île-de-France | ilhememaliki@gmail.com | 07 55 97 42 99 | oloyiin | Ilhême Maliki | mon-portfolio

PROFILE

Telecommunications engineering graduate with 3 years of apprenticeship experience in critical IT and network infrastructures. Experienced in network supervision, VoIP systems, large-scale device management (50,000+ endpoints), and infrastructure deployment. Strong interest in network integration, system stability, and performance optimization within international environments.

PROFESSIONAL EXPERIENCE

Network & VoIP Infrastructure Engineer (Apprenticeship), BPCE IT — Jan. 2026 - Présent

- Maintain and analyze multi-site VoIP architectures (Cisco, Alcatel)
- Provide Level 3 technical support and root cause analysis
- Automate system checks to improve reliability and operational efficiency

MDM & Infrastructure Supervision Engineer (Apprenticeship), BPCE IT — Jun 2024 - Jan 2026

- Supervised and managed 50,000+ corporate devices
- Deployed applications and managed system configurations
- Implemented KPIs to monitor performance and optimize infrastructure stability

Network Architecture & Energy Monitoring (Apprenticeship) , Vinci Energies — Sept. 2023 - Jan. 2024

- Designed network architecture for sensor deployment
- Defined data flows and supervision processes
- Coordinated technical stakeholders to ensure system performance

Systems Deployment Intern, NGTV Experience — Nov. 2022 - Feb. 2023

- Installed operating systems and enterprise software
- Developed automated OS deployment scripts
- Conducted testing and validation of workstations

EDUCATION

Engineering Degree in Telecommunications, INSA Lyon, France — Sept. 2023 - Sept. 2026
Specialization: Networks & Infrastructure

Exchange Program – Trinity College Dublin, Ireland — Sept. 2025 - Jan. 2026
School of Electronic and Electrical Engineering

DUT in Computer Science , IUT Lyon 1, France — Feb. 2021 - Feb. 2023

ACADEMIC PROJECTS

Network Infrastructure Deployment

- Designed and deployed multi-client network architecture (IP routing, DHCP, NAT, BGP)
- Secured network access
- Performed validation testing and technical documentation

Containerized Environment – MicroK8s

- Orchestrated containerized services
- Performed resilience and dependency testing
- Implemented monitoring and supervision

AI Study Assistant

- Conducted functional analysis
- Designed software architecture
- Implemented solution in Java
- Validated through structured testing scenarios

TECHNICAL SKILLS

- Networking : BGP, OSPF, MPLS, Routage IP, DHCP, NAT
- Programming : Python, Java, C#, Bash, PowerShell
- Tools : ServiceNow, Zabbix, VMware, Workspace ONE, Microsoft Active Directory
- Systems : Linux, Windows, Docker, MicroK8s

LANGUES

French
Native

English
Professional

STRENGTHS

Adaptability in complex environments
Strong teamwork abilities
Analytical mindset
Problem-solving skills
