PROFILE

Telecommunications Engineer (INSA Lyon) with 3 years of experience in critical IT environments, particularly in banking. I work on complex production infrastructures with a focus on monitoring, incident resolution, and operations automation. I enjoy understanding systems in depth and designing solutions that improve reliability, visibility, and efficiency.

PROFESSIONAL EXPERIENCE

Systems & Network Engineer - BPCE IT — **Jan 2026 - Present**

Environment: Cisco CUCM, Alcatel OXE, SIP, NICE, Python

- Operations and monitoring of telecom and systems infrastructures in a critical banking environment.
- Analysis and resolution of production incidents (service quality, traffic flows, recordings).
- Contribution to service reliability and continuity.

Key Project - Morning Check Automation

- Designed an automated tool to validate the proper operation of VoIP flows.
- Implemented a monitoring pipeline based on voice analysis: automated calls -> recording retrieval -> transcription -> validation.
- Automated anomaly detection through comparison between expected and recognized messages.

Stack: Python · SIPp · VOSK · FFmpeg · FastAPI · React

Monitoring & MDM Engineer - BPCE IT — **Jun 2024 - Jan 2026**

Environment: Zabbix, ServiceNow, Workspace ONE, VMware, Active Directory

- Monitored a fleet of 50,000 devices and the related infrastructure.
- Managed incidents, changes, and production releases in an IT environment.
- Implemented technical indicators to track service quality.
- Improved monitoring and reporting processes.
- Collaborated with infrastructure, security, and application production teams.

IoT Architecture & Deployment Engineer - Vinci Energies — **2023 - 2024**

- Designed architectures for IoT sensor deployments.
- Defined network flows and monitoring requirements.
- Produced technical documentation.

Systems Deployment & Automation - NGTV Experience — **2022 - 2023**

- Developed an automation script to accelerate deployments.
- Installed and configured technical equipment.
- Performed compliance validation and technical support.

EDUCATION

Engineering Degree in Telecommunications - INSA Lyon — **2023 - 2026**

Academic Exchange - Trinity College Dublin — **2025 - 2026**

DUT in Computer Science - IUT Lyon 1 — **2021 - 2023**

TECHNICAL SKILLS

DevOps & Automation	**Python · Bash · PowerShell · FastAPI · CI/CD · Scripting**
Networks & Telecom	**SIP · Cisco CUCM · Alcatel OXE · BGP · OSPF · MPLS · LAN/WAN**
Monitoring & Observability	**Zabbix · ServiceNow · NICE · KPI · Dashboard**
Systems & Virtualization	**Linux · Windows Server · VMware · Active Directory**
Development	**Python · Java · C# · Bash · PowerShell**

LANGUAGES

French: Native — **English: B2**

Additional work: academic projects in orchestration (MicroK8s), network infrastructure, and monitoring.
